## NBCI Condemns Obama Administration's Drone Policy as Murder and Evil

*No one has the right to take a life; they are playing God*

**Washington DC** – The National Black Church Initiative (NBCI), a faith-based coalition of 34,000 churches comprised of 15 denominations and 15.7 million African Americans calls Obama's policy on the right to kill Americans who are associated with terrorist organizations either at home or abroad murder, which constitutes evil in the Christian tradition. The Holy Scripture says, "THOU SHALT NOT KILL".

Our founding fathers and decent, hard-working American find such policies irrational and without moral merit. The Obama Administration has us believe that terrorism is the greatest threat to humanity, and that they reserve the right through the secular American creed to kill anyone, anywhere, who they label part of a terrorist organization. This is why they spent 1 trillion dollars to go after ONE man. To make the point that we will kill you dead, and that is the creed of the American soul.

The church is trying to transform the evil mentality that exists in this country. That is our goal. We believe that the greatest threat to humanity are laws that assume moral absolutism to determine who lives and who dies. This is not only foolish in nature, this is destructive. Should we be reminded of the words of Jesus Christ, Mahatma Ghandi, and Martin Luther King, that violence can only beget more violence. There can never be a legal rationale that gives a government the right to destroy a human being that God created. Only God preserves that right for himself.

The Revered Anthony Evans says, "I do not know what to say after the pronouncement of this evil policy. This policy has led me to a life of prayer for the soul of this administration and for this President. Anyone who has had anything to do with formulating a policy like this either in the Bush or Obama administration will have to answer before God one day. May God have mercy on their souls."

Rev Evans continued to ask where the outcry against such a policy is, saying “Where are the loud the mouths and the so-called drum majors for justice when it comes to correcting this president and this administration on this evil policy. Where are you Al Sharpton?? Where are you Jesse Jackson?? Where are you Ben Jealous?? Where are you John Lewis?? Where are you members of the Black caucus? Where are the Catholic bishops?? Where are you “The American Way”?? Where are you Rev. Jim Wallis? Where are you Pastor T.D. Jakes? Pastor Creflo Dollar? Where are you Joseph Lowry? Where are the Southern Baptists? Where are you Pastor Joel Osteen? Where are you Dean Alton Pollard? If the church does not speak against this immoral policy we will lose our moral voice, our soul, and our right to represent and preach the gospel of Jesus Christ.”

The black church is not only appalled that this comes out of the administration of the only black president, but we are frightened by the monstrous tendencies that have emerged from this administration. The unleashing of the mechanical drones kill not only their target but everyone that is near who is morally innocent of any crime. The church’s heart cries out for mercy and sanity for such an ill-conceived policy. President Obama has to be roaringly condemned by the entire Christian church for allowing such a policy to emerge from such a promising administration.

NBCI cannot be proud of this, and neither can we be supportive of it. This policy should be condemned by both liberal and conservative and especially those who love mercy, do justice, and walk humbly before God.

### **About NBCI**

The National Black Church Initiative (NBCI) is a coalition of 34,000 churches working to eradicate racial disparities in healthcare, technology, education, housing, and the environment. NBCI’s mission is to provide critical wellness information to all of its members, congregants, churches and the public. NBCI offers faith-based, out-of-the box and cutting edge solutions to stubborn economic and social issues. NBCI’s programs are governed by credible statistical analysis, science based strategies and techniques, and methods that work.
