Rev. L.K. Floyd , President
Ms.Mignon Anderson, Vice President
Secretary, Min. Kymberly Jerry
Treasurer, Dr. Carolyn Gilmore
Logistics, Rev. Leslie Taylor

Dear Rev. Evans,

We are happy to write this letter of support for the National Black Church Initiative (NBCI) and its comprehensive COVID-19 Plan – NBCI’s Sustainable Action Plan to Maintain the Health of the African American Community 2020-2025: COVID-19: Eradicating Underlying Disparities in Healthcare to vaccinate 106 million Blacks and Latinos against COVID-19. This plan is implemented under the leadership of their President and CEO, Reverend Anthony Evans.

The Coalition of Churches and Community USA is an organization that we continuously worked with as a Christ-centered organization for the betterment of all mankind. NBCI is one of the main faith-based organizations that we turn to for critical and technical support. We have a great partnership, and have worked with them, and their member-churches successfully in the past.

Our churches are entities are strategically aligned with the NBCI churches in support of their community enhancement agenda. This simply means that we work together on many projects such as the state census, voter registration, evangelism, and many more. NBCI’s comprehensive COVID-19 plan speaks to the very heart of what we do in the church: serving all communities especially those who are marginalized, including but not limited to the homeless, those who have dependent children, those who have pre-existing conditions or compromised immunity, those who are disabled or blind. All these communities are included in the Black church. We urge you to work with and support NBCI and we ensure you that the National Baptist Convention, USA, Inc. will support them in these endeavors as well.

We commend Mr. Charles Pickens, and the critical technical and medical support he is bringing to augment this program. Both of his entities, SRS, Inc., and LabLINQ will provide overall medical support for the vaccination of the 106 million African Americans and Latinos in this country.

We are one of many National Coalitions and Conventions that are supporting the NBCI plan and Reverend Evans.

We will continue to support him and this plan until we can get back to our churches. Our main concern right now is helping to fulfill President Biden's COVID-19 Plan for all Americans (and this plan fits right in), working with all governors, city mayors, and every single federal, state, local, and county health officials in the country. Reverend Evans and NBCI will be working under my leadership and with Charles Pickens to ensure that not only the 106 million African Americans and Latinos are vaccinated against COVID-19, but all Americans.

Sincerely,

Rev. L. K. Floyd
President
