

# NBCI Is Seeking to Help Newly Diagnosed Lung Cancer Patients Who Are Members of Our Churches

G1 Therapeutics is enrolling patients in two studies for patients with extensive-stage SCLC to determine the potential benefit of GIT28 in addition to chemotherapy. These studies are investigating the potential clinical benefit of GIT28 in protecting bone marrow and preserving the immune system when administered prior to chemotherapy.

The first study (GIT28-02) is for newly diagnosed patients who have not yet received chemotherapy. The second study (GIT28-03) is for previously treated patients whose tumors have progressed (relapsed). In both studies, patients will receive either GIT28 or a placebo along with chemotherapy.

All patients will receive the standard of care chemotherapy. Treatment cycles will occur without interruption, except when necessary to manage potential side-effects or for administrative reasons (e.g., out of town). A delay of up to 2 weeks is permitted to allow recovery from any side-effects.

## Potential benefits of GIT28

- **Protect bone marrow and preserve the immune system during chemotherapy**
- **Potential to significantly improve anti-tumor responses and patient outcomes by:**
  - **Enabling planned chemotherapy regimens and preserving immune system function**
  - **Reducing infections, bleeding, hospitalizations, transfusions, and growth-factor usage**

*G1 is currently recruiting patients for two Phase 1b/2a trials in SCLC*

### GIT28-02 study

- First line extensive stage SCLC
- Multi-center, randomized
- Carboplatin and etoposide + GIT28
- Approximately 90 patients
- Clinicaltrials.gov identifier: [NCT02499770](https://clinicaltrials.gov/ct2/show/study/NCT02499770)

### GIT28-03 study

- Previously treated SCLC
- Multi-center, randomized
- Topotecan + GIT28
- Approximately 90 patients
- Clinicaltrials.gov identifier: [NCT02514447](https://clinicaltrials.gov/ct2/show/study/NCT02514447)

## **Where patients and caregivers can learn more:**

To determine whether you are eligible for either study, please visit [www.g1cancertrials.com](http://www.g1cancertrials.com) and discuss this fact sheet with your doctor.

**About NBCI**  
The National Black Church Initiative (NBCI) is a coalition of 34,000 African American and Latino churches working to eradicate racial disparities in healthcare, technology, education, housing, and the environment. NBCI's mission is to provide critical wellness information to all of its members, congregants, churches and the public. The National Black Church Initiative's methodology is utilizing faith and sound health science. Visit our website at [www.natblackchurch.com](http://www.natblackchurch.com).
